

Build better with genuine Universal Instruments performance and reliability enhancements

Upgrade/Retrofit	Description	Prerequisites/Notes
Fuzion 4.x Software with Added Security	Upgrade to the latest software and enjoy a host of available programming, NPI and changeover features. Windows 10 upgrade included.	Fuzion A, B and D-Block or Genesis Series II @ UPS+ 8.5 with PC Vision
Electrical Verification Tester (EVT)	Guarantee good device placements whether presented from tape, tray, tube, or bulk. EVT ensures that components with an incorrect electrical value or orientation, or those that are out of specification or damaged, are not placed. A critical resource for production in high-integrity market sectors such as automotive, defense, medical and avionics.	Genesis Series II or Fuzion A,B, D, E and F-Block machines with minimum Fuzion 4.x software
High-Accuracy License	Achieve precision component placement for challenging high-accuracy applications. Brings 7-spindle placement heads to $\pm 20\mu\text{m}$ accuracy and 30-spindle placement heads to $\pm 25\mu\text{m}$ placement accuracy @ Cpk 1.	Fuzion A,B, D, E and F-Block machines with minimum Fuzion 4.x software
ion™ Window Latch for Gold Feeders	Ensure that feeder windows are safely secured during production to avoid interference.	Available for 16/24/32mm Gold feeders
Interlock Diagnostics	Easily determine the status of individual interlocks on the user interface screen.	Fuzion A,B and D-Block machines built prior to July 2020
